

The Children's Workshop

Infection Control

EYFS: 3.44, 3.45, 3.46

At the Children's Workshop we promote the good health of all children attending through maintaining high hygiene standards and reducing the chances of infection being spread. We follow the health protection in schools and other childcare facilities guidance¹ which sets out when and how long children need to be excluded from settings, when treatment/medication is required and where to get further advice from.

Viruses and infections can be easily passed from person to person by breathing in air containing the virus which is produced when an infected person talks, coughs or sneezes. It can also spread through hand/face contact after touching a person or surface contaminated with viruses.

We follow the guidance below to prevent a virus or infection from spreading around the pre-school. Our staff:

- Encourage all children to use tissues when coughing and sneezing to catch germs
- Ensure all tissues are disposed of in a hygienic way and all children and staff wash their hands once the tissue is disposed of
- Develop children's understanding of the above and the need for good hygiene procedures in helping them to stay healthy
- Wear the appropriate Personal Protective Equipment (PPE) when changing nappies, toileting children and dealing with any other bodily fluids. Staff are requested to dispose of these in the appropriate manner and wash hands immediately
- Clean and sterilise all potties and changing mats before and after each use
- Clean toilets daily and check them throughout the day
- Remind children to wash their hands before eating, after visiting the toilet and playing outside and explain the reasons for this
- Clean all toys, equipment and resources on a regular basis by following a comprehensive cleaning rota and using antibacterial cleanser, or through washing in the washing machine
- Wash or clean all equipment used as and when needed when the children have placed it in their mouth
- Follow the sickness and illness policy when children are ill to prevent the spread of any infection in the pre-school. Staff are also requested to stay at home if they are contagious.

In addition:

- The pre-school manager retains the right of refusal of all children, parents, staff and visitors who are deemed contagious and may impact on the welfare of the rest of the pre-school

¹ <https://www.gov.uk/government/publications/health-protection-in-schools-and-other-childcare-facilities>

- Parents will be made aware of the need for these procedures in order for them to follow these guidelines whilst in the pre-school
- Periodically each room in the pre-school will be deep cleaned including carpets and soft furnishings to ensure the spread of infection is limited. This will be implemented earlier if the need arises
- In the event of an infection outbreak the pre-school will, where appropriate, undertake a deep clean to ensure the spread of infection is contained
- We will follow any the Government health guidance, as well as legal advice and our information from our insurers on any national outbreak of a virus/ pandemic and keep parents informed of any course of action. Each specific circumstance will differ and to ensure we take the most appropriate action we will treat each case on an individual basis.
- In addition, where contagious outbreaks occur, will adopt government guidance for all visitors to minimise risk of further spreading the risk of infection
- The pre-school will ensure stocks of tissues, hand washing equipment, cleaning materials and sterilising fluid are maintained at all times and increased during the winter months or when flu and cold germs are circulating.
